

AMENDMENTS TO THE SPECIFICATION

Kindly replace paragraph [0041] as follows:

[0041] Figure 6 shows a zoomed in view of Genre 3 that would be displayed if the user selects Genre 3 510 from Figure 5, e.g., by moving the cursor 508 over the area encompassed by the rectangle 514 surrounding Genre 3 on display 212 and depressing a button on the input device. The interface can animate the zoom from Figure 5 to Figure 6 so that it is clear to the user that a zoom occurred. An example of such an animated zoom/transition effect is described below. Once the shape 516 that contains Genre 3 occupies most of the screen on display 212, the interface reveals the artists that have albums in the genre. In this example, seven different artists and/or their works are displayed. The unselected genres 515 that were adjacent to Genre 3 in the zoomed out view of Figure 5 are still adjacent to Genre 3 in the zoomed in view, but are clipped by the edge of the display 212. These unselected genres can be quickly navigated to by selection of them with selection pointer 508. It will be appreciated, however, that other exemplary embodiments of the present invention can omit clipping neighboring objects and, instead, present only the unclipped selections. Each of the artist groups, e.g., group 512, can contain images of shrunk album covers, a picture of the artist or customizable artwork by the user in the case that the category contains playlists created by the user.
